Institutional Distinctiveness

Goat Research and Training Center

U.P. College of Veterinary Science and Animal Husbandry, Mathura began its journey in the year 1947 with independence. Recognizing significance of livestock, fisheries and other allied disciplines and their possible role in growth of national and state GDP, Uttar Pradesh Pandit Deen Dayal Upadhyaya Pashu Chikitsa Vigyan Vishwavidyalaya Evam Go-Anusandhan Sansthan, Mathura, was established in year 2001. Ever since the establishment of College, it has contributed significantly not only in terms of number of graduate and post-graduate of high scholastic order, but also quality research of national and international standards. University has produced over 2000 graduates and 200 postgraduates and doctorates during last nearly 21 years apart from more than 40000 veterinarians have passed the shores since 1947. The University has been pioneer in undertaking research in various aspects of animal production and health.

Keeping in view, that 80% of farmers are categorized as small, marginal and landless. This particular section is most vulnerable and primarily engaged in goat husbandry. Goat husbandry has provided means of survival and sustenance to our rural population. It was felt that positive intervention through breed improvement can definitely help goat rearers in uplifting their economic condition. Hence, University established, first of its kind and state of art, Goat Research and Training Center to improve goat husbandry practices for doubling the farmers income. Center boasts of dedicated laboratories for buck semen, elite buck and goat stock.

It was also felt that goat is reared primarily by the females of the family due to their small size and easy handling. Hence, with strong focus on 'Women empowerment' and 'अन्तयोदया' farmer friendly best management practices were adapted to promote scientific goat husbandry without any extra inputs.

The center focuses on three economic traits associated with goats viz., fecundity (High kidding percentage), Growth rate and milk yield to improve farm economics of families associated with goat husbandry.

The Center maintains goat elite animals of 8 indigenous and 2 exotic goat breeds under intensive feeding to promote breed improvement. The emphasis of farm is to disseminate superior germplasm to farmers' doorstep. For reaching out to different stakeholders, different aspects of goat husbandry cycle are covered and farm focuses on following:

Maintaining and sale of superior germplasm animals based on intensive feeding system

It is the only Goat research and training center in country that maintains 8 indigenous and 2 exotic goat breed. The animals are being bred following strategic breeding techniques to consolidate economic traits together and disseminate developed germplasm to farmers in form of supply of live animals for breeding and farm development. More than 168 goats of different breeds have been supplied to farmers and governmental agencies for breed

improvement throughout country. Moreover, considering limitation of available pasture land for animals, developing modules of animal rearing in limited area has been one of the

mandates. Concept of goat rearing under intensive feeding (stall feeding) is becoming very popular among farmers with small land holding and limited resources for income generation through goat husbandry.

Production of frozen semen doses (FSD) of goat

University has established one of the largest frozen goat semen production stations in India. Unit provides FSD of 8 elite indigenous goat breed of India and 2 exotic goat breed. The unit started popularization of frozen goat semen doses for breed improvement in Jan 2020 with an initial demand of 1500 FSD in year 2019-20. Despite of Covid -19 pandemic, the unit continued its effort to connect with farmers and in year 2022-23 more than 1.33 lac doses were made available for insemination to more than 14 states across country through state animal husbandry department and non-governmental organization (NGO). Till now, more than 2.46 lac FSDs at a total cost of more than Rs. 79 lacs have been supplied to the stakeholders. More than 5000 farm families have been benefited by this initiative.

Human Resource Development

With a determination to promote self-employment and improve goat husbandry practices especially among the small, marginal and landless farmers for human resource generation and provide opportunity for startup programmes to rural youth, the unit started training programme for veterinary officers, AI workers, school dropout girl students, farmers with special emphasis to women farmers. Regular visit and orientation programmes are being conducted. As on date 244 veterinary officers from 7 states, 88 women farmers, 297 farmers and 196 AI workers have been trained in past 3 years. Apart from this more than 3000 farmers have been oriented for prospects of goat husbandry as income source.

Memorandum of Understanding

To improve impact and outreach of University has signed MoU with 5 NGOs working in more than 18 states across India. Innovation and applied research is conducted at farm and its applicable results are being shared by farmers through NGOs. Dissemination of information had great impact in addressing problem associated with farmers at their doorstep. Farm has provided solution to basic problem of kid motility, ration balancing and utilizing farm waste as feed for goats.

Semen evaluation and certification laboratory

A dedicated semen evaluation and certification laboratory for goat semen has been established for semen evaluation for improved conception rate. Laboratory is also used for assurance of semen quality that is being supplied. In addition to it, laboratory has facility of evaluating cattle, buffalo, sheep, poultry and pig semen. The sex sorted semen supplied to state of Uttar Pradesh by ABS Pvt Ltd. is being evaluated for quality at this center.

U.P. Pandit Deen Dayal Upadhyaya Pashu Chikitsa Vigyan Vishwavidyalaya Evam Go-Anusandhan Sansthan (DUVASU), Mathura

उ.प्र. पंडित दीन दयाल उपाध्याय पशुचिकित्सा विज्ञान विश्वविद्यालय एवं गो-अनुसन्धान संस्थान (दुवासु), मथुरा

High end research and innovation

Laboratory is equipped with high end instrument to conduct advance research. Students and scientist from departments and other institutes are conducting research. More than 20 Masters and 4 doctorate students have conducted their research in laboratory established at goat center.

Zero waste goat integrated farming system

A demonstration unit has been established with concept to utilize each and every component of farm product and waste through their integration. The feed waste and mature as waste products are being converted to manure, vermicompost, fish feed etc. that add to farm economics of goat rearer.

उ.प्र. पंडित दीन दयाल उपाध्याय पशुचिकित्सा विज्ञान विश्वविद्यालय एवं गो-अनुसन्धान संस्थान (दुवासु), मथुरा

Goat Research and Training Center

The center functions through five different methodologies to reach out to its beneficiaries, so that all aspects for efficient requirement of goat husbandry are catered competently. For this, center not only maintains but also supply superior germplasm through live animals, semen doses of superior and proven bucks, training to the veterinary officers, livestock extension workers (AI workers), NGOs working in goat husbandry area, goat farmers, unemployed youth, lady farmers, school dropouts and interested participants. Apart from these visits are regularly conducted for farming community so that more and more people adapt this profession.

The Vice Chancellor
DUVASU University
Mathura

Dear Sir

Request for 1000 Vials of Jamunapari Goat Semen

We are the largest dairy farm in Sri Lanka. We also rear Saanen goats for goat milk production and also have a herd of Jamunapari Goats. Our objective is to improve the genetic qualities of our herd of Jamunapari goats and promote cross breeding.

For us to obtain the import permit from the Department of Animal Production and Health in Sri Lanka, we will be in need of the following documents.

- (a) Health Certificate giving the following;
- Date of birth of the donor goat
 - Date of collection of semen
 - Date of approval for artificial insemination
 - AI Centre address and registration number.

(b) Pedigree Certificate

We also need for Air Cargo purpose a MSDS Certificate (Material Safety Data Sheet) confirming the packing safety of the N3 cylinder and its specifications.

We would highly appreciate if you could please assist us in this endeavor to import Jamunapari goat semen from India.

Thanking you.

Yours faithfully,

Memorandum of Understanding

U.P. Pt. Deendayal Upadhyaya Pashu Chikitsa Vigyan Vishwavidyalaya evam Go Anusandhan Sansthan (DUVASU), Mathura
And
Professional Assistance for Development Action (PRADAN)

U.P. Pt. Deendayal Upadhyaya Pashu Chikitsa Vigyan Vishwavidyalaya evam Go Anusandhan Sansthan (DUVASU), Mathura and PRADAN, both are working in small ruminants sector independently in their respective field. University through its scientific interventions and PRADAN through its wide experiences and network in different States across the country (Jharkhand, Bihar, Odisha, West Bengal, Chhattisgarh, Madhya Pradesh & Rajasthan) will work together with a Memorandum of Understanding (MoU) in small ruminants sector. The Veterinary University (DUVASU) Mathura and PRADAN will work together in following field related to small ruminant sector –

1. Capacity Building & trainings

- Certified training courses on Artificial Insemination to the workers of PRADAN and knowledge of scientific goat farming as per the module designed by the University
- Training and certification of Pashu Mitra / Pashu Sakhi or Pashu Scout (more progressive and willing to adopt the new technology) as named by organization for imparting technical assistance to farmers at their door step. It will be done both online as well as off-line mode.

2. Promote entrepreneurship among the rural youth

- Work together on issues relevant for up gradation of small ruminant sector different states of country, where PRADAN is working. DUVASU will make available cryopreserved buck semen for breed improvement as per need and demand on rates as framed by university.

Different products may be developed related to feed, nutrition supplements like mineral mixtures, digestive powder etc. As technical partners DUVASU will help in developing the formulation and certifications, as relevant.

3. Front line demonstrations, action research and publications

- PRADAN will take up the activity of DUVASU for Front Line Demonstration (FLD), extension, training and promotion of innovative and new technologies developed and designed by DUVASU in small ruminants sector in PRADAN's intervention area/ states. Both parties will identify relevant areas of action research/field trials and may go for publications for wider public interest.

The final decision and the action plan that includes terms and conditions, including financial implications if any, for working together on particular objectives will be taken after mutual discussion of senior officers of both the organization through common consensus, from time to time. Each such meeting will be facilitated by In-charge, Goat Farm, DUVASU Mathura and will be conducted under the chairmanship of Dean CoVSc & A.H, DUVASU, Mathura, U.P. with all other officials as its member and representatives from PRADAN.

Memorandum of Understanding

U.P. Pt. Deendayal Upadhyaya Pashu Chikitsa Vigyan Vishwavidyalaya evam Go Anusandhan Sansthan (DUVASU), Mathura and Genus Breeding India Pvt Ltd (ABS India) both are working in livestock sector independently in their respective field. University through its scientific interventions is in process to impart scientific knowledge and inputs to farmers. Genus Breeding India Pvt Ltd (ABS India) is engaged in cattle breeding through supply of superior germplasm as cryopreserved conventional and sexed semen doses and embryos. With wide experiences in reproduction and network in different states across country, ABS is now preparing frozen cattle sex semen doses at its sexed semen lab located at Babugarh, Distt Hapur, Uttar Pradesh and also in collaboration with different states across country. With an objective to maintain quality of frozen semen and improve conception rate under field condition through periodic assessment of semen quality and develop better modules for AI in cattle, Under an Memorandum of Understanding (MoU) - Veterinary University (DUVASU) and Genus Breeding India Pvt Ltd (ABS India) will work together in following field related to conventional and sexed genetics -

➤ University shall extend the laboratory facilities at Semen analytical and Certification Unit, DUVASU, Mathura for analysis of frozen semen samples as per the standard operating procedure shared by Genus Breeding India Pvt Ltd (ABS India) under Non-disclosure agreement with lab charges of Rs 50,000 (Fifty Thousand) per month (excluding applicable GST) with a limit of analyzing maximum 30 samples per month.

The consumables for analysis will be provided by Genus Breeding India Pvt Ltd (ABS India) and a duly verified semen dose evaluation report for same will be provided by University designated scientist/expert. University would raise a Performa Invoice to Genus every month (in first week of month start) which would be paid by the Company in advance towards evaluation of the semen sample.

University and ABS will work together to conduct novel research in cattle reproduction both at farm and in field of Cattle and buffalo reproduction as per need-based requirement with mutual agreement. Work together in other area of research relevant in improving farmer's income with mutual agreement.

The final decision and the action plan that includes terms and condition for working together on particular objective will be taken after discussion of senior officers (as nominated by Dean CoVSc&A.H, DUVASU, Mathura and General Manager, Genus Breeding India Pvt Ltd (ABS India) through common consensus. The meeting will be facilitated by In-charge semen analytical and certification unit, DUVASU Mathura. The decision of Dean CoVSc&A.H. (in consultation with HOD Vet Physiology and HOD Vet Gynecology when ever required) shall be final in all cases brought for his consideration in this regard. The MOU will effective for the period of 3 years or till the time the sexed semen Project is operational at semen station, Babugarh, Distt Hapur, Uttar Pradesh, whichever is earlier.
